Max:

After my discussion with Dan Hope, Head of Building Management Group, National Capital Region (NCR), GSA, with respect to turning on the hot water at CIA and Federal buildings, I also talked to John Myers, Commissioner, Public Buildings Service, NCR, GSA, and asked him what steps could be taken to get the hot water back on. He reiterated Hope's negative comments insofar as anything being done immediately, but stated that he expects guidance from OMB very soon on turning it back on. Apparently the delays in OMB on this and building temperatures stem from substantial deficits in GSA's budget in FY-81 and FY-82 in terms of the increased energy required. Myers promised to keep us posted of any change.
